🧠 SKILLS

React | Javascript | Tailwind CSS | HTML | CSS | Git/GitHub | React Router

Mobile-first Design | React Context | Vite

📁 PROJECTS

Designo, *Agency Website (Frontend Mentor Guru Challenge)* ⧉
- Implemented React Hook Form and Yup for custom form validation
- Utilised Tailwind CSS to make all pages mobile, tablet and desktop responsive
- Implemented React Router to navigate between pages

Quizzical, *Web based Trivia App* ⧉
- Implemented a customisable call to the Open Trivia API - the player can select a category and difficulty
- Designed with Tailwind CSS with mobile first principles in place
- Utilises state to track the players score throughout the quiz

The Brew Box, *Ecommerce store* ⧉
- Products are organised into collections and displayed using filter() and map() functions - Customers can view each collection individually or view all products
- Implemented React Router for seamless and intuitive navigation between all pages
- Implemented React Context for a persistent cart that tracks the products and amounts that customers have added - product quantities can be increased or decreased from cart page

Coin Stats, *Crypto Market Coin Stats* ⧉
- Utilises the Coin Gecko API to display the most important pieces of data for each cryptocurrency (rank, current price, % change and market cap)
- Implemented React Router to allow users to easily click any coin and display detailed information
